Foundation Mother and Child in Cape Maclear Newsletter June 2014

www.jeannette.tremele.nl

This year, my parents were finally able to travel to Malawi. In the last years they played an important role in foundraising for the charity and now finally they have seen the feeding program live.

Picture above showes my parents, uncle and aunt and Dorothy, who's translating for me in the feeding program for years. She educates the mothers about nutrition and explains how to use the feeding supplements.
In the last months we have extended the feeding program. Instead of feeding supplements for only the under fives, we also feed 10 children between the ages of 5 till 12 years.

Picture above shows a mother with her twins. She is deaf-dumb and tries to make a living with selling vegetables and fruit. She's walking up and down the village several times a day, with a big basket full of fruit and vegetables balancing on her head. Her twins weights are almost in between the goal lines of

the grow curve.

The pictures on this page show children from the feeding program with donated nitted hats from Ireland.

This picture shows Sanne, Timba's Dutch teacher. She is helping me with taking weights of the 110 children of the feeding program.

Thanks for all support!
Jeannette
